

**How do we find the Panel names / Menu names given a Record name?
You can use the same query the records / menus, given a Panel name.**

```
SELECT DISTINCT C.MENUNAME, B.PNLNAME, D.RECNAME,  
D.RECTYPE  
FROM  
  PSPNLGROUP A,  
  PSPNLFIELD B,  
  PSMENUITEM C,  
  PSRECDEFN D  
WHERE  
  A.PNLNAME LIKE 'VENKAT%'  
  AND A.PNLNAME = B.PNLNAME  
  AND B.RECNAME <> ''  
  AND A.PNLGRPNAME = C.PNLGRPNAME  
  AND A.MARKET = C.MARKET  
  AND B.RECNAME = D.RECNAME  
  AND D.RECTYPE IN (0, 1)  
ORDER BY C.MENUNAME, B.PNLNAME
```
